ALLISON BARRICKLOW

CYBERSECURITY INTERN

aab05@nmsu.edu | (505)814-8265 | github.com/abarricklow | linkedin.com/in/allison-barricklow

EDUCATION

NEW MEXICO STATE UNIVERSITY
BACHELOR OF SCIENCE IN CYBERSECURITY — **Expected Graduation May 2027**
MASTERS OF SCIENCE IN COMPUTER SCIENCE — **May 2028**
GPA: 3.9

SKILLS

Languages: Python, Java, PowerShell, Bash, SQL
Cyber: WireShark, Linux (RHEL), Windows, Virtual Machines(WSL/RHEL/Kali), nmap, Network Concepts
Professional: Git, GitHub, Scrum Workflow, Excel, Autodesk Civil 3D, Web Development (Vaadin, Flutter)

WORK EXPERIENCE

Holds Secret Clearance (DoD)

Cyber Engineer Intern | Northrop Grumman — **June 2026 - August 2026**

- Enabled Asset managers to quickly visualize license usage and optimize subscriptions, contributing to an estimated $40,000 in annual cost savings and significant time savings.
  - Designed and implemented an end-to-end automation pipeline to track software license ownership and utilization using PowerShell, Python, and Windows Scheduled Tasks.
  - Led all aspects of the solution, creating maintainable scripts and processes.
- Contributed to the migration of an internal Java/Vaadin web application.
  - Collaborated in code reviews and testing to ensure reliability throughout the migrated web application.

Education Outreach Coordinator | Young Women in Computing — **January 2025 - Present**

- Updating and maintaining professional website for students, parents, and companies to refer to.
- Developing Computer Science curriculum tailored for middle school and high school students.
  - Designing code for students to emulate (e.g. Message Encryptor), training language models.
- Providing course tutoring, mentorship, and community for students in the Computer Science department.
- Analyzed, compiled, and presented research at Emerging National Researchers Conference in Spring 2025.

Engineering Intern | Lee Engineering, LLC — **May 2024 - July 2024**

- Processed and analyzed large traffic datasets, to extract speed profiles and peak-hour congestions patterns.
- Built models of proposed road networks, including 3D bridge simulations for project visualization to clients.
- Drafted and refined proposals based on stakeholder feedback to progress projects into the next phase.

LEADERSHIP AND INVOLVEMENT

Desert Dev Labs Hackathon — **April 2026**

- Placed 2nd out of 27 teams in a 48 hour long hackathon.
- Used real data from NMSU to program a decision-support tool for farmers suffering from water shortages.
- Pitched our web app to a panel of judges, which secured us second place.

Computer Science Student Alliance — **August 2024 - Present**

- Developing an interactive website for members to host profiles and share resources.
- Coordinating mock interviews and guest speaker sessions to support member growth.
- Competed in Hack NMSU 2026 - programmed a community resource web app

Cybersecurity Club — **August 2024 - Present**

- Ranked top 26% at the Hivestorm Fall 2024 Cybersecurity Competition.
- Used and developed cybersecurity skills in The National Cyber League Fall 2024 Competition.
  - Log analysis, network scanning, forensic investigation.

CAHSI Allyship Program — **September 2024 - Present**

- Collaborating with novice computing scholars through mentorship on tech career opportunities and graduate school.
- Engaging in coding and resume workshops with other universities to strengthen academic and professional skills.
- Attending national tech conferences
  - Emerging National Researchers (2025), Great Minds in STEM (2025, 2026)
